Contents

Preface ix

Temperature effect on the rightward shift of the oxyhemoglobin dissociation curve in physiological conditions
Ch. Bailleul, Ch. Refour, M. Chassaigne and C. Ropars 1

Internalization of various allosteric effectors of hemoglobin in human erythrocytes
Ch. Bailleul and C. Ropars 9

A three-compartment mathematical model for drug administration by using red blood cells as bioreactors
G.I. Bischi, F. Solimano and M. Magnani 17

Erythrocytes as carriers of the Ricin A chain for targeting to the reticuloendothelial system
N. Chestier, R. Kravtzoff and C. Ropars 29

Re-examination of factors which influence erythrocyte senescence using a new model of red cell aging
G.L. Dale 41

Human and murine erythrocytes as bioreactors releasing the antineoplastic drug 5-fluoro-2'-deoxyuridine
E. Zocchi, L. Guida, C. Polvani, M. Tonetti, G. Damonte, U. Benatti and A. de Flora 51

Encapsulation of human recombinant interleukin-2 into carrier erythrocytes by hypoosmotic dialysis and its subsequent biological activity
J.R. DeLoach, K. Andrews and C. Kruse 59

Encapsulation and kinetics of muramyl dipeptide in murine carrier erythrocytes and attempted treatment of *Babesia* in mice with free and encapasulated drug
J.R. DeLoach, K. Andrews, S. Sharp and G.G. Wagner 67

An SEM study of morphological changes in erythrocytes from several species during carrier cell preparation
R.E. Droleskey, E.G. Moore, K. Andrews and J.R. DeLoach 73

Aprotinin release by loaded mouse erythrocytes
G. Falcioni, R. Gabbianelli, A. Concetti, V. Grelloni, L. Zolla and M. Brunori 87

Metabolic properties of human inositol hexaphosphate loaded red blood cells
G. Fiorelli, S. Villa, E. Lisei, E.N. Cusa, M.B. Colombo, L. Sabbioneda, F. Rossi and A. Zanella 93

Low affinity RBC prepared by the osmotic pulse method: analysis of heterogeneity by density fractionation and flow cytometry
R.S. Franco, R.L. Barker-Gear and R.L.V. Gates 101

RBC modification by an osmotic pulse: comparison of seven species
R.L. Barker-Gear and R.S. Franco 111

A fusion protein containing the cytochrome B_5 hydrophobic domain associates with cell membranes
G.M. Ihler, S.K. George and Y.-H. Xu 117

In-vivo activity of L-asparaginase entrapped into human and mouse red blood cells
R. Kravtzoff, I. Desbois, M. Chassaigne, J.P. Muh, J.P. Lamagnere, Ph. Colombat and C. Ropars 127

Erythrocyte carriers made osmotically and by electroporation: evidence for uptake by endocytosis as well as by passive diffusion
C.A. Kruse and G.W. Mierau 139

Comparative studies of entrapment of three enzymes in erythrocytes, hexokinase, acetaldehyde dehydrogenase, and bilirubin oxidase
M. Laguerre, C. Ropars, M. Magnani, R. Kravtzoff and M. Chassaigne 151

Human red blood cells as bioreactors for the release of 2', 3'-dideoxycytidine, an inhibitor of HIV infectivity
M. Magnani, M. Bianchi, L. Rossi and V. Stocchi 159

Increased glucose consumption by human and mice erythrocytes overloaded with hexokinase and glucose oxidase
L. Rossi, M. Bianchi and M. Magnani 169

Viability of the IHP-loaded red cell in the hypoperfused isolated rat heart
M. Samaja, R. Motterlini, M. Tarantola, M. Beretta, F. Rossi, L. Sabbioneda, M. Porcellati, and A. Zanella 181

Clinical evaluation of doxorubicin in canine carrier erythrocytes as therapy for canine lymphosarcoma
W.C. Satterfield, M.S. Clarke, M.J. Hill and J.R. DeLoach 189

Signals for recognition of resealed erythrocytes by reticuloendothelial cells
R.A. Schlegel and P. Williamson 195

The large scale production of white ghosts by hypoosomotic dialysis and ultrafiltration
C.L. Sheffield and J.R. DeLoach 199

Antagonism of cyanide intoxication with rhodanese encapsulated resealed erythrocytes
J. Way, E. Cannon, P. Leung, R. Davis, D. McGuinn, C. Yao, C. Chui and A. Naqi 207

Opportunities and pitfalls in the potential use of resealed erythrocytes with incorporated xenobiotics
M. Weiner 213

IHP-loaded red cells; *in-vitro* and *in-vivo* properties
A. Zanella, L. Sabbioneda, F. Rossi, V. Russo, G. Aguggini, G. Fiorelli, S. Villa, A. Brovelli, M.A. Castellana, C. Seppi, C. Barlassina and G. Sirchia 219

Enhanced antineoplastic efficiency of erythrocyte encapsulated doxorubicin in a murine liver metastatic model
E. Zocchi, M. Tonetti, C. Polvani, L. Guida, A. Gasparini, U. Benatti and A. de Flora 231

Electroporation of human recombinant intereukin-2 and its encapsulation into erythrocyte carriers: demonstration of its bioactivity
D.H. Mitchell, G.T. James and C.A. Kruse 239

Subject Index 251
